

Task Force on Enhancing Knowledge Sharing in the EHEA community

Action Plan

Introduction

The Task Force on Enhancing Knowledge Sharing in the EHEA Community (TF) was created to counter the widespread concern that the "stakeholders" (higher education students and staff, employers and society at large) are often not aware (or correctly informed) about what the Bologna Process and the EHEA are, what their values are, what areas they address, what they have accomplished, what impact they have had and have on higher education systems in the member countries and how their goals can best be addressed today. The impression in many countries is that the BFUG and the EHEA is or has become a 'bubble' that does not spread knowledge of the important work it does, and is not sufficiently interested in gathering (or able to gather) input from the rich and varied experience of actual practitioners in the higher education world.

The need to address this issue is clearly recognised in the Rome Communiqué, which states: *"We commit to **building a more closely connected and sustainable higher education community**, which fosters inclusion, communication, cooperation, and solidarity, essential for the **relevance and excellence of the future EHEA**. To accomplish this, we commit to keeping our national higher education sectors informed about and involved in EHEA developments, and to working closely with student and higher education associations and networks on the development and implementation of national reforms. We recognise the importance of the broad consultations carried out to identify priorities for the future of the EHEA and ask the BFUG to organise EHEA events such as **transnational seminars, workshops and hearings** involving the wider higher education community (students, academic staff and external stakeholders), to discuss present and future goals and explore collaborative ways to address them."*

In this passage, the Communiqué also indicates specific paths along which to develop a closer and more positive relationship with the stakeholders.

To take up this commitment, the BFUG decided, in its meeting on 13 - 14 April 2021, to create a "Task Force". This was understood to be an agile and active working group that would address the needs identified. 15 countries and organisations joined the group (Albania; the Flemish Community of Belgium; Germany; Italy; Malta, The Netherlands, Romania; Ukraine; United Kingdom; EQAR; ESU; ETUCE; EUA; EURASHE; European Commission), and it is co-chaired by Albania, Italy and Romania. Furthermore, at its 1-2 December 2021 meeting, the BFUG decided that the TF would develop an action plan.

The words "Enhancing Knowledge Sharing" in the name of the Task Force emphasise emphasises the dialogic nature of its proposed activities: these are not to focus on top down 'communication' about the Process, but rather on an organised attempt to ensure better knowledge flows in all directions, so that the stakeholders and the Bologna structures (BFUG and working groups of all denominations) can share accurate knowledge, and build it together.

The ultimate aspiration is to enhance quality in education and research, to increase the mobility of staff and students (physical or online) and to foster cooperation between HEIs, countries and regions.

The Project (IN-GLOBAL)

The Enhancing Internal Knowledge and Global Dialogue of EHEA (IN-GLOBAL) project is funded within the ERASMUS+ programme for a period of three years, starting May 2022. The coordinator of the project is CIMEA – Italy, and the partners are the Romanian Ministry of Education and the University "POLITEHNICA" of Bucharest. The Prime Minister's Office of Albania is an associated partner.

Funds are available within the IN-GLOBAL project to support specific activities of the task force, as underlined in the table below.

Specific tasks, proposed activities and timelines

The Rome Communiqué lists actions or activities to be implemented, which set an initial agenda for the Task Force. The Communiqué mentions the need to 'inform' and 'involve' the higher education sector in developments; it refers to working 'closely' with higher education and student organisations. The reference to 'involvement' in development as well as implementation points clearly to building a new relationship with the higher education community.

The Communiqué refers to the 'importance' of the 'broad consultation' which was carried out in the first semester of 2019, which suggests that the TF might review the very interesting material gathered at that time on "priorities" and perceptions of the Bologna Process and the EHEA.

The Communiqué indicates 'events' (exemplified by, but not limited to, "transnational seminars, workshops and hearings") with the stakeholders, and mentions that these activities should aim at better ways to address future goals in a collaborative manner.

Most importantly, the Communiqué indicates that these actions and activities relate to the present and future goals of the EHEA and collaborative ways to address them.

Coordination with the work of other working structures will be a priority, especially with the Global Policy CG. After all, the EHEA is unique in its form and results and may serve as an example for global cooperation and dialogue.

The TF will assess the implementation of the proposed activities, and inform the BFUG, if adaptations are necessary.

The following table specifies the activities of the TF, describes steps to implement each activity and sets indicative timelines. All task force members will be involved in reviewing the outcomes of different activities. Some members are coordinating or are directly involved in the implementation of a specific action. Depending on the allocation of tasks, task force members are mentioned in the column *Countries/Organisations involved*. Moreover, it is specified if support from experts hired within the IN-GLOBAL project is available.
